Fluke ii915, ii905, and ii500 Acoustic Imagers

SOUNDSIGHT™ TECHNOLOGY

ACOUSTIC IMAGING
Blended live SoundMap™ with visual image

DISPLAY
7-inch 1280 x 800 LCD with capacitive touchscreen

LEAKQ™ MODE
Leak quantification: on-device estimated leak size and cost indications

MECQ™ MODE
Mechanical inspection: on-device feature to detect and document mechanical issues, available on ii915

PDQ MODE™
Partial discharge: on-device PD classification, available on ii915

SoundSight™ refers to the Fluke technology of converting sound waves to a visual image.

The all-in-one tool you have been looking for to visualize leaks, partial discharge, and mechanical issues.

Leaks: Hidden Costs Due to Leaks in Compressed Air, Gas, Steam, and Vacuum Systems.

While most manufacturers know these leaks exist, addressing them has been time-consuming and tedious. With the Fluke ii Series and minimal training, your maintenance technicians can begin checking for leaks during their typical maintenance routine—even during peak operation hours. The ii Series Acoustic Imagers let technicians see sound as they scan hoses, fittings, and connections for leaks. Its built-in acoustic array of tiny sensitive microphones generates a spectrum of decibel levels per frequency. Based on this output, an algorithm calculates a sound image, known as SoundMap,™ that is superimposed on a visual image. The SoundMap is automatically adapted depending on the frequency level selected so that background noise is filtered out, making it incredibly simple to detect compressed gas leaks.

Mechanical: First-Line Inspection to Locate Potential Mechanical Issues Early and Avoid Unplanned Downtime

Conveyor systems, with their vast size and intricate components, often pose a maintenance challenge, threatening to disrupt production and cause unplanned downtime. The Fluke ii915 with MecQ™, a game-changer in the field, enables efficient scanning of large areas, detecting and documenting potential issues for more targeted maintenance. With its contactless scanning and advanced noise filtering, the Fluke ii915 Acoustic Imager with MecQ™ Mode ensures safety and delivers clear images even in high-noise environments. By detecting areas of concern early on, it instills confidence in its users, enabling proactive measures to prevent costly problems, surpassing traditional methods. For professionals seeking to ensure seamless operation of large conveyance systems, the Fluke ii915 Acoustic Imager with MecQ™ is the ultimate choice.

Partial Discharge: The Invisible Threat... Now You Can See

Partial discharge, a serious issue that can lead to arc flash fires, blackouts, explosions, and danger to life, is now a visible threat. Whether you are inspecting insulators, transformers, switch gears, or high-voltage powerlines, the Fluke ii915 Acoustic Imager with PDQ Mode™ is your proactive tool. This tool, designed for high-voltage electricians, electrical test engineers, and grid maintenance teams, translates the sound of partial discharge into visuals that pinpoint the location. With an extended frequency range of 2-100 kHz, the ii915 enables early detection of potential problems, empowering you to plan maintenance and prevent catastrophic events.

	ii500	**ii905**	**ii915**
LeakQ™	Scale (1-10)	Leak size scale, leak rate, and leak cost estimation	Leak size scale, leak rate, and leak cost estimation

Tripod Connector		•	•

*Depending on ambient conditions

Large 7" touch screen
High resolution 7" capacitive, full color touch screen, supports interaction with interface menu.

Operating time
Stay powered all day with six hours of operating time

One button capture image
Capture images on-the-go with one click, no need to navigate the menu for image capture

Intuitive user interface
Easy to use with minimal training.

- Features supporting common workflows
- Unique customizable frequency band filter
- On-device real time data
- Customizable profiles for different inspection types

Ergonomic to use
Adjustable hand strap and adjustable neck strap

Tripod connector
ii915 and ii905 models come with standard ¼"-20 UNC threaded hole for easy tripod mounting and clear images or video

Annotate and tag
Tag your inspections by adding photo notes, asset identifiers, text notes, and follow-up actions, including priority. Use QR codes to easily identify your inspections. No hassle or errors with seamless integration using the FlukeConnect™ desktop and online reporting software.

Reduce the frustration of unplanned downtime in four easy steps

1. Locate
Quickly and easily scan areas and pinpoint where unusual sounds are coming from – even those sounds out of range for human hearing.
2. Document
Take a screenshot of the point of interest. Then annotate and tag the photo to define follow-up action and urgency.

3. Share
Share the annotated screenshots with your team so they can respond and schedule maintenance.

4. Repair
Investigate the pinpointed areas further during planned downtime to determine what the problem is and proactively fix it.
Specifications

Key Features	ii500	ii905	ii915
Sensors			
Frequency band	2 kHz to 52 kHz	2 kHz to 65 kHz	2 kHz to 100 kHz 2 kHz to 52 kHz
Detection range[1]	0.5 to > 50 meters (1.6 to > 164 feet)	0.5 to > 70 meters (1.6 to > 230 feet)	0.5 to > 120 meters (1.6 to > 393 feet)
Field of view (FOV)	63°± 5°		
Nominal frame rate	25 FPS		
Built-in digital camera (visible light)			
Field of view (FOV)	63°± 5°		
Focus	Fixed lens		
Zoom	No zoom	3 x digital zoom	
Resolution	0.3 MP	5.0 MP

Reporting Tools

LeakQ report generator

The LeakQ reporting tool allows you to create organized and detailed reports with the images you captured on your Fluke ii915 or ii905 or ii500* acoustic imaging camera. Now you can analyze leaks severity scale, leak size and leak cost estimations and share those results with anyone.
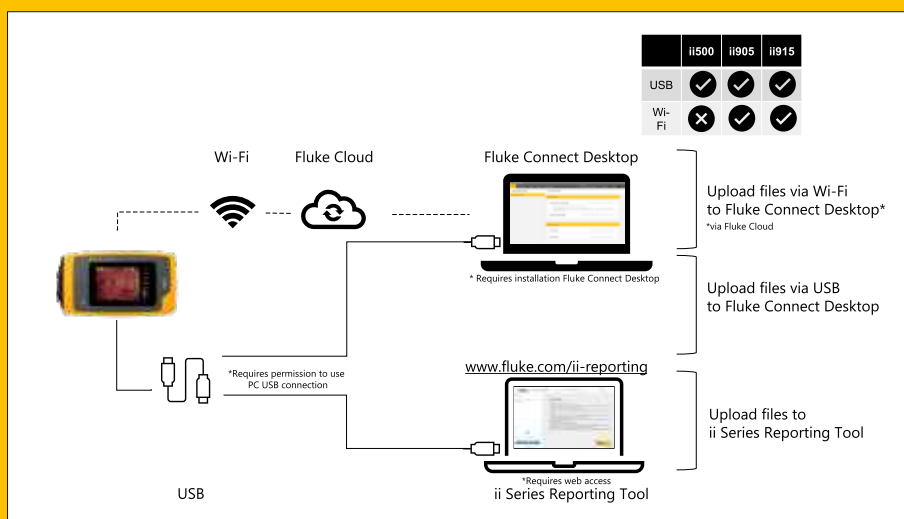

PDQ Mode™ Reporting Tool

The PDQ reporting tool allows you to create organized and detailed reports with the images you captured on your Fluke ii915 Acoustic Camera with electrical discharge classifications and share those results with anyone.

Steps for report generation

- Move the AS2 files from your camera to a file folder on your computer.
- Open the LeakQ report generator and accept the terms and conditions.
- Drag and drop the AS2 files from your computer to the gray upload box below.

To develop a detailed report, you'll need to input certain variables such as operating frequency, among others.

Once all your variables have been updated, select: Generate Report. The report is a word/pdf document with all the input variables listed out, along with any comments you've included, and a summary with all the LeakQ or PDQ or MecQ listed. Each image is also included in the report, along with any details you provided.
